

ASHTON D. SHANHOLTZ

Woodstock, Georgia | +1 304-240-2280 | adshanholtz@outlook.com | [LinkedIn](#)

EDUCATION

Bachelor of Science | Computer and Information Science, Shepherd University | Graduated May 2025

Overall GPA: 3.50

Relevant Courses

- Adv. Computer Lang. Concepts
- Networking
- Windows Programming
- Data & File Structures
- Web Programming
- Algorithms
- Intro to AI
- Database Mgt. Systems
- Computer Graphics

RELEVANT EXPERIENCE

Customer Lead | Food Lion, WV | September 2025 – June 2026

- Supervised front-end customer service staff, ensuring efficient service and professionalism.
- Acted as a contact point for customer questions and satisfaction.
- Assist management with coordination of workflows through efficient communication.
- Assist cashiers with technical issues and customer satisfaction escalations.

Software Engineer (Academic projects) | Shepherd University | August 2022 – May 2025

- **C#/Unity Software Developer – Go Fish and fishing hybrid game against AI.**
 - Applied Agile SCRUM to manage sprints, team tasks, and development workflow.
 - Used VS Code, GitHub, and Fork for development, version control, and workload management.
 - Built a custom C# Finite State Machine (FSM) in Unity to implement AI opponent behavior.
 - Developed C# scripts and OOP class structures using various data structures to handle gameplay logic, spawning, and scoring systems.
 - Designed and integrated 2D game assets using LibreSprite for polished visual elements.
 - Delivered full gameplay systems, mechanics, and UI within one semester; published the game on itch.io for public testing.
- **JavaScript Software Developer – 3D Browser Game.**
 - Programmed a 3D player character, environment, and enemies using JavaScript, HTML, and CSS.
 - Implemented acceleration, gravity, and responsive movement mechanics for smooth gameplay.
 - Built a frame-by-frame collision detection system for all in-game interactions.
 - Delivered a polished, high-performance game
- **Python Software Developer – Assignment Planner Tool**
 - Built an intuitive DearPyGUI interface for easy input of assignment data (due dates, weights, names).
 - Utilized dictionaries and structured data handling to standardize inputs and manage CSV file read/write operations.
 - Implemented an algorithm that ranks assignments by priority using due dates, weights, and other factors.
 - Added reliable data load/save functionality to maintain persistent academic planning data.
 - Delivered a fully functional tool that improved workload organization

SKILLS

Languages: C#, C++, Python, MySQL, Java, JavaScript, HTML/CSS, GDScript

Tools: Microsoft Visual Studio, Visual Studio Code, GitHub, GitLab, AWS, Godot, Supabase

Frameworks: Unity, React, AngularJS, Node.js

Technical Skills: Agile, Full-Stack, Front-end Development, Programming, Web Development, Back-End Web Development, Object-Oriented Programming, Linux

Soft Skills: Adaptable, Collaborative, Creative Thinking, Resourceful, Problem Solver, Self-Starter
